

## SQUARE 400-B

is equipped with innovative technological features and is indispensable for the packaging of different products (sauces, liquids, meat, fish and vegetables), finding application in different sectors. Equipped with a predisposition system for inert gas injection (on request) it is also able to pack particularly delicate and fragile products.

### SEALING BAR

## Technical specifications

### OVERALL DIMENSIONS

510x560x460 h

### VACUUM PUMP

Q= 16 m³h-OIL-BUSCH

### ABSORPTION

1.15 KW

### SIZE OF THE CHAMBER

410x450x220 h

### SEALING SYSTEM

impulse diaphragm

### VOLTAGE

230 V/50 Hz

### SEALING BAR

400 mm

### WEIGHT

58 kg

### STRUCTURE

stainless steel

## Options

- Inox trolley
- Vacuum sensor + liquiq sensor
- Voltage and special frequency
- Busch pump
- Inerte gas injection
- Cableless piston sealing
- Lid hook
- Labels printer
